

DP03

Selected Economic Characteristics: 2005-2009

2005-2009 American Community Survey 5-Year Estimates

NOTE. Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

For more information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

Geography: Estancia town, New Mexico

Selected Economic Characteristics	Num	ber	Percent	
	Estimate	Margin of Error	Estimate	Margin of Error
EMPLOYMENT STATUS				
Population 16 years and over	1,880	+/-506	1,880	(X)
In labor force	403	+/-105	21.4%	+/-8.1
Civilian labor force	403	+/-105	21.4%	+/-8.1
Employed	373	+/-106	19.8%	+/-7.8
Unemployed	30	+/-41	1.6%	+/-2.2
Armed Forces	0	+/-127	0.0%	+/-2.0
Not in labor force	1,477	+/-514	78.6%	+/-8.1
Civilian labor force	403	+/-105	403	(X)
Percent Unemployed	7.4%	+/-9.9	(X)	(X)
Females 16 years and over	560	+/-123	560	(X)
In labor force	274	+/-86	48.9%	+/-12.9
Civilian labor force	274	+/-86	48.9%	+/-12.9
Employed	244	+/-81	43.6%	+/-12.4
Own children under 6 years	41	+/-43	41	(X)
All parents in family in labor force	34	+/-41	82.9%	+/-31.6
Own children 6 to 17 years	193	+/-111	193	(X)
All parents in family in labor force	82	+/-54	42.5%	+/-30.8
COMMUTING TO WORK		,, 01	.2.070	., 5515
Workers 16 years and over	347	+/-103	347	(X)
Car, truck, or van drove alone	278	+/-90	80.1%	+/-14.2
Car, truck, or van carpooled	48	+/-47	13.8%	+/-12.1
Public transportation (excluding taxicab)	0	+/-127	0.0%	+/-10.2
Walked	0	+/-127	0.0%	+/-10.2
Other means	0	+/-127	0.0%	+/-10.2
Worked at home	21	+/-29	6.1%	+/-8.2

Related children under 5 years	56.8%	+/-51.6	(X)	(X)
Related children 5 to 17 years	39.5%	+/-25.1	(X)	(X)
18 years and over	22.7%	+/-9.9	(X)	(X)
18 to 64 years	19.8%	+/-11.2	(X)	(X)
65 years and over	30.6%	+/-22.3	(X)	(X)
People in families	24.9%	+/-13.0	(X)	(X)
Unrelated individuals 15 years and over	42.4%	+/-19.1	(X)	(X)

Source: U.S. Census Bureau, 2005-2009 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Notes:

Â-Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection. For guidance on differences in employment and unemployment estimates from different sources go to Labor Force Guidance.

Â-Workers include members of the Armed Forces and civilians who were at work last week.

Â-Occupation codes are 4-digit codes and are based on Standard Occupational Classification 2000.

Â-Industry codes are 4-digit codes and are based on the North American Industry Classification System 2002 and 2007. The 2005, 2006 and 2007 ACS data are coded using NAICS 2002 while the 2008 and 2009 ACS data use NAICS 2007 codes. Categories that differ between 2002 and 2007 NAICS are aggregated so that the 5 years of data are consistent in display and reflect the NAICS 2007 codes. The Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.

Â-Selected earnings and income data are not available for certain geographic areas due to problems with group quarters data collection and imputation. See the ACS User Notes for details.

Â-Logical coverage edits applying a rules-based assignment of Medicaid, Medicare and military health coverage were added in 2009 -- please see http://www.census.gov/hhes/www/hlthins/publications/coverage_edits_final.pdf for more details.

·While the 2005-2009 American Community Survey (ACS) data generally reflect the November 2008 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

3 of 4 01/08/2016

Â-Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

- 1. An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
- 2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
- 3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
- 4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
- 5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
- 6. An '***** entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
- 7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
- 8. An '(X)' means that the estimate is not applicable or not available.
